

College of Dentistry

About the College > Goals and Objectives

Goals and Objectives

1. Develop an academic program in dentistry that is recognized as a leader in the region in both education and innovation.
2. To ensure that its graduates are grounded with the appropriate knowledge and clinical skills that encourage lifelong learning and critical thinking.
3. Contribute to the advancement of scientific knowledge in dentistry and oral health through research.
4. Provide oral health care services with integrity and accountability to the community.
5. Promote collaborative academic activities with other healthcare organizations and universities.
